

AS BUSINESS - DAY 10

Leadership and organisation

Styles, delegation and communication

YOUR AIM TODAY

Match leadership style and structure to a situation.

YOUR RULE

Read the notes twice. Use exact case facts. Every explanation must contain a because link and a therefore business impact. Keep page 4 closed.

Student: Rohan

Start time: _____ Finish time: _____

Date: _____

Knowledge and method

Leadership influences people; management plans and coordinates resources.

- Autocratic leaders make decisions centrally.
- Democratic leaders consult employees.
- Laissez-faire gives substantial freedom to skilled workers.
- Delegation passes authority but the manager keeps accountability.
- A wide span of control means one manager supervises many people.

MINI CASE

MedCode has 18 expert developers. A security incident needs a fix within four hours. For its next six-month product, developers say consultation will improve innovation and commitment.

WORKED CHAIN

Autocratic leadership may suit the urgent incident because one fast decision reduces delay. It may be less suitable for the six-month product, where expert ideas improve innovation.

Knowledge, application and analysis

Use the mini case in Questions 3-6.

Question	Your answer
1. Define delegation.	
2. Define democratic leadership.	
3. Explain why autocratic leadership fits the incident.	
4. Explain one drawback of using it for six months.	
5. Explain one benefit of delegation to expert developers.	
6. Recommend leadership styles for both situations.	

QUALITY CHECK

Circle every case fact. Underline every because link. Box every business impact.

Models and correction log

Wording may differ, but the knowledge and chains must be accurate.

Q	Answer / model points
1	Passing authority to a subordinate to perform a task while the manager remains accountable.
2	A style in which employees are consulted before decisions.
3	The four-hour deadline needs speed and clear authority, reducing time spent consulting.
4	Experts may feel ignored, lowering motivation and reducing useful ideas for innovation.
5	It uses specialist knowledge and can speed decisions while developing employee responsibility.
6	Use autocratic direction during the incident, then democratic leadership and delegation for product development, with clear security limits.

Q	Missing layer	My improved sentence

SEND FOR MARKING

Send pages 3 and 4. Ask for a level, missing chains, and a rewritten model for the weakest response.
